FROM THE DESK OF DR. BRADLEY CALOBRACE

## DESIGNER BREAST AUGMENTATION

All too often, Breast Augmentation is approached from one stand alone question, "What size do you want to be?" It is as if a bigger size is all that really matters. Considering the many patients who seek a breast reduction for large, pendulous breasts, it is clear – bigger is not always perceived as better. Maybe a better question is, "What would you like your breasts to look like?" Or, "What shape would you like your breasts to be?" When I ask these questions to my patients, they express their desire to have more volume in the right locations – in the upper poles of the breasts with better cleavage and less hanging

below the fold of the breast. While some want a more rounded look, many others desire a completely natural look which has been sometimes difficult to achieve with a round implant.

We are very excited that **NEW Natural Shaped Implants** are now available. I have been highly involved in the planning and introduction of shaped implants in the U.S. market. While all three implant companies plan to have shaped implants available very soon, Sientra® is the first to achieve FDA approval (Dr. Mizuguchi and I are investigators) and these implants are now available and being used in our practice. So, for those of you who desire a natural, more teardrop result, the new Sientra shaped implant may be for you.

Now, in 2012, Dr. Mizuguchi and I evaluate breasts with a "Designer Approach", making decisions that will achieve the absolute best result for each patient. Implants now come in different shapes, heights, projections, textures and sizes. At Calobrace Plastic Surgery Center, we utilize the wide variety of different implants from all three implant companies to provide hundreds of choices for our patients to find the best fit. Implants can be placed under the breast, under the muscle or partially under both. Incision locations vary and a variety of breast lifts are used in patients requiring more lifting than an implant alone can achieve.

So, if you have questioned breast enhancement because of fear of looking "fake" or too round, the **NEW Natural Shaped Implants** may be a perfect choice for you! Call 502.899.9979 to schedule a consultation with me or Dr. Mizuguchi. Our VECTRA 3D breast simulator can help you make the perfect choice.

Brooke Burke Charvet and Dr. Calobrace together in Los Angeles during a recent *Mentor* event. Dr. Calobrace is nationally recognized as one of the leading educators and lecturers for Mentor on breast augmentation. *Mentor* has launched a national campaign featuring Brooke Burke. They joined forces in LA this past July for the National Sales Team Educational Meeting entitled "Make the Difference".

# HAIR RESTORATION PROGRAM

## NEOGRAFT

Calobrace Plastic Surgery Center and CaloSpa are proud to offer a new hair restoration program to help improve the quality and quantity of hair. We are the first in Kentucky to offer the most advanced method of

hair restoration, **NeoGraft** follicular unit extraction system. By combining medical treatments, **NeoLTS Light Therapy System**, and **NeoGraft**, with **NueHair** products you can now maximize hair volume naturally and beautifully.

There are many causes of hair loss but the most common is Androgenetic Alopecia in both **men and women**. It is a genetic cause where DHT (a testosterone derivative) attacks hair follicles resulting in loss of hair. Typically, this affects the top of the head. Other causes of hair loss include major stress (telogen effluvium), infections, medicines and underlying medical conditions (diabetes).

**NeoGraft** is the least invasive procedure for hair transplantation with minimal risk of bleeding and damaging blood vessels and nerves. With this device each hair unit from the back of the head (donor area) is harvested individually (units) and placed in the thinning or balding areas on the top of the head. Hair transplantation is successful because the hair in the back of the head is genetically programmed not to fall out. This hair transplant can be performed **without a scalpel** and **leave no visible linear scar** for faster healing and less discomfort. **NeoGraft** hair restoration system also causes less damage to grafted hair follicles, drastically increasing the chances that your hair transplant will be successful.

Left: Pre-op. Right: 8 months after procedure.

**Nana N. Mizuguchi, MD, FACS**

Nana N. Mizuguchi, MD, FACS is a dual board-certified plastic surgeon who is a leader, an innovator and an expert surgeon in the field of aesthetic plastic surgery.

Left: Pre-op. Middle: 8 days after procedure. Right: 8 months after procedure.

**NeoLTS Photo Therapy System** – Red light is effective for hair regrowth because it can stimulate energy production. Green light increases oxygen in the scalp to help with production of energy. **NeoLTS Photo therapy produces energy that stimulates growth in a pain free 30 minute treatment.** Perfect if you have early signs of hair loss and thinning and want to avoid surgery. NeoLTS is a series of 20 treatments.

**NueHair** Therapeutic Shampoo, Nourishing Conditioner and Thickening Hair Boost add fullness to fine or thinning hair. They are free of sulfates, ethoxylates and paraben wax. This means it will not clog or damage your hair follicles. The Thickening Hair Boost contains vitamins for hair growth and ingredients to enrich the scalp blood flow. They will not fade dyed or colored hair and can be purchased at CaloSpa.

Call **502.899.9979** for a consultation today to see if you are a good candidate for Hair Restoration.

# EXCEPTIONAL EMPLOYEES, EXCEPTIONAL SERVICE

BY: LYNN WADE, DIRECTOR OF OPERATIONS

At CaloSpa we strive to offer 5 star customer service from start to finish. Our staff is highly trained to serve our clients in the very best way possible. Many of our staff have been with CaloSpa and/or Calobrace Plastic Surgery Center for over 10 years. We want to thank our clients for their continued patronage. We welcome your comments so we can continue to provide 5 star customer service.

**Congrats on OVER 10 years of dedicated service.**

# ZO SKINCARE - 6 STEPS FOR BASIC SKINCARE

BY: DR. ZEIN OBAGI

1. Cleanse the skin to normalize. Oily skin will use Oilacleanse and dry skin will use Normacleanse.
2. Exfoliate to smooth skin and stimulate. Use Effects® Exfoliating Polish.
3. Reduce sebum [oil on the skinsurface]. Use Cebatrol pads, both morning and night.
4. Repair skin with Vitamin A + antioxidants using the Ossential® Daily Power Defense in the morning only.
5. At night, use Ossential® Growth Factor Serum which renews and stimulates skin with anti-aging, anti-inflammatory ingredients and Vitamin A.
6. Sun protection is the last step in the mornings with Oclipse® Sunscreen + Primer SPF 30. This sunscreen has physical blockers, antioxidants and melanin.

**Above:** Revolutionary skincare lines, ZO Medical & ZO Skin Health are exclusively sold at CaloSpa.

**Left:** Dr. Zein Obagi, world renowned skincare expert and special guest at CaloSpa's Beverly Hills in the Ville-ZO Launch with Dr. Nana Mizuguchi and Dr. Calobrace on the Louisville Walk of Fame.

# ANTI-AGING PRESCRIPTION BY: DR. BRADLEY CALOBRACE

Left: Dr. Calobrace from ten years ago.  
Right: Dr. Calobrace today.

As many of you know, this is my 16th year in practice in Louisville. If you do the math, you may figure out that I just may **be turning 50** this year! So, I thought it would be helpful to share with you my own personal approach to skin health and anti-aging.

**Good Skincare** – Every man should maintain facial skin fitness with a simple home regimen. I started skincare in my mid 30's and today I use a ZO® skincare regimen that is easy and highly effective. It includes a cleanser (Oilacleanse), Daily Power Defense, Cebatrol oil control pads and sunscreen. I use the ZO exfoliating polish 3 to 5 times per week.

**Good Exfoliation** – My approach includes shaving, exfoliating cleanser and exfoliating polish. It is also helpful to have more effective exfoliation every 1 to 2 months at CaloSpa with **microdermabrasion, chemical peels, hydrafacial, oxygen facials** and/or **spa facials**.

**Reduce Wrinkles with Botox or Dysport** – Every guy who struggles with deep forehead lines, frownlines or crowfeet should really consider treatment 2 or 3 times a year. It is easy, painless and highly effective. Once you start, you will never stop! I started when I turned 40 and usually get 2 to 3 treatments per year.

**Add Youthful Volume with Fillers (Restylane, Perlane, Juvederm, Radiesse, Belotero)** – Adding back volume lost under the eyes (to hide those dark circles and bags) and in the cheeks can provide a rested, more youthful look. It also can soften wrinkles and folds that appear deeper as we age. I began using fillers at 45 and get 1 to 2 injections a year (2 syringes at a time). The results last approximately one year. **Stimulate facial collagen with Sculptra.** This is great for men as it can promote facial collagen production, adding your own collagen and volume slowly to the face. This usually takes 2 to 3 sessions spaced 6 weeks apart. No recovery is needed with minimal or no bruising. I have received Sculptra twice, starting 3 years ago. The results last 3 to 5 years.

**Laser Hair Removal** – We have been doing Laser Hair Removal for 15 years and IT WORKS. When a hair removal package is purchased at CaloSpa we provide treatments for a whole year with no additional cost. We are committed to getting as much hair reduction as possible. In men, LHR is great for the back, shoulders, chest, arms and abdomen. We have the newest Lightsheer LHR system that is much faster and minimal discomfort. I underwent LHR at 40 and get a maintenance treatment every year.

**Cosmetic Surgery** – Sometimes, surgery can provide more significant changes that are more permanent than nonsurgical options can provide. Men commonly undergo liposuction, eyelid surgery, neck or facelift procedures, nose reshaping and hair transplantation (see article on Neograft). The goal of cosmetic surgery with men is a quick recovery and a natural appearance. Personally, I had a small amount of liposuction in my lower abdomen at age 44 and I had my upper eyelids done (upper blepharoplasty) with a small neck procedure under the chin at age 49.

I have shared my personal journey with you because I want you to know I truly believe in all of the procedures and I know you will be amazed at how effective these treatments can be for you. My best advice is to start early if you can, but know it is never too late. There is simply nothing wrong with looking as great as you feel!

Left: Dr. Calobrace before Blepharoplasty  
Right: Dr. Calobrace 3 months after Blepharoplasty.

## **NEW** **coolsculpting**® by Zeltiq Coming to CaloSpa

Left: Before CoolSculpting flanks. Right: After CoolSculpting flanks.

Say good-bye to those stubborn fat cells for good! The newest innovation in fat cell elimination is coming to CaloSpa! CoolSculpting® will permanently destroy fat cells using cold energy. CoolSculpting is great for areas such as your "love handles" and belly fat. This FDA approved procedure takes about an hour per treatment area and has no "down time". CaloSpa is offering **20% OFF CoolSculpting Treatments** at its 11th Annual Open House. Start sculpting your new figure!

**RSVP FOR OPEN HOUSE  
BY CALLING 502.899.9982**

# VECTRA 3D IMAGING BY: DR. NANA MIZUGUCHI

We now offer **Vectra 3D Imaging** for our **facial, breast and body procedures**. We are now able to simulate the expected results of a variety of aesthetic procedures, including breast augmentations, breast lifts, rhinoplastys, chin augmentations, facelifts, tummy tucks, liposuction and more! In addition to simulating the results of surgical procedures, the Vectra Imaging system can simulate the results of non-invasive procedures, such as those involving the use of injectable fillers. The 3D image will also allow you to see yourself and your possible results from all angles, as well as side-by-side.

Left: Pre-op dermal fillers  
Right: Simulated post-op dermal fillers

Left: Pre-op Tummy Tuck and Liposuction  
Right: Simulated Post-op Tummy Tuck and Liposuction

The breast augmentation simulation tool is valuable in helping women choose their implant sizes. Various implant types and sizes can be placed and viewed as a 3-dimensional image. We have used similar 3D imaging technology for breast surgery over the last several years and can't imagine doing breast consultation without this extraordinary tool.

Now this advanced Vectra 3D Imaging tool can be used for facial and body contouring procedures as well. Previously, images were only manipulated and shown in 2-dimensions. Now, any manipulation in the face or body can be viewed in 3D!

Vectra 3D Imaging by Canfield Imaging Systems will help you make a confident choice by allowing you to see what you will look like after your surgery.

## LASER Q&A BY: TRINA HOLMES, RN

With so many lasers to choose from these days, CaloSpa decided to ask one of our experts for all the correct answers and guidance. Trina Holmes has been with Calobrace Plastic Surgery Center and CaloSpa for 8 years and receives these questions on a daily basis.

**Q: What laser treats brown spots most effectively?**

**A: Fotofacials** achieve the best results when treating hyperpigmentation (brown or age spots). **Fotofacial** is a gentle, no downtime treatment performed in a series of 5 treatments. It combines RF (radiofrequency) and IPL (intense pulse light) technology to improve pigmentation, color, vascularity and overall complexion of face, neck or body. **Fotofacials** are also great for those with redness like Rosacea, broken capillaries or blotchy skin. The procedure is performed in our Medi Spa in about an hour and a half and treated every 4 to 6 weeks.

*(Regular price: \$2,000, Open House price: \$1,600)*

**Q: Which laser is best at treating "jowls"?**

**A: Radio Frequency (RF)** technology such as **Exilis RF** or **Refirme** produces great results. These light energies use precise heat to warm up the dermal tissue within the targeted treatment area to stimulate collagen and firm loose skin. There is little to no downtime with either treatment and both are performed in a series of treatments. Candidacy will be based upon your complimentary consultation.

*(Exilis series of 5 – Regular price: \$1,600 Open House price: \$1,280)*

*(Refirme series of 5 – Regular price: \$2,500, Open House price: \$2,000)*

**Q: Do you have a laser that helps treat acne scarring?**

**A: Fraxel** repair would be the best option for any acne scarred patient. This laser is performed in our operating room under general anesthesia with about a week of downtime. This laser improves discoloration, texture, pore size, fine lines, wrinkles, acne scarring AND can do a little tightening. If you want real results with one treatment then this is the laser for you.

*(Fraxel Repair –20% off if purchased NIGHT OF OPEN HOUSE. Fraxel Restore series of 4 – Regular price: \$3,500, Open House price: \$2,800)*

Left: Actual patient before series of Fotofacial RF treatments  
Right: Actual patient after series of Fotofacial RF treatments

**Q: How do I know if I am a good candidate for Laser Hair Removal?**

**A: At CaloSpa** we perform a thorough consultation that includes a test spot of the area you would like to treat. Our LightSheer Duet **Laser Hair Removal** System not only offers a safe and effective treatment but it is more tolerable with minimal discomfort and saves you time. **Laser Hair Removal** clients are treated every 4 to 8 weeks, depending on the area, to maximize results. CaloSpa offers one low price and endless treatments for ONE full year. *(Call for your complimentary consultation and pricing per area.)*

# IS YOUR SKIN HOLIDAY READY?

BY: DANA SMALLWOOD

RSVP FOR OPEN HOUSE  
BY CALLING 502.899.9982

As the winter season approaches we look forward to the holidays and our patients commonly ask how they can look their very best during the holiday season. Overall, our patients want to know how they can get a fresh and natural appearance with little to no down time. Here are 4 simple steps to gear you up for the holidays.

## 1. Address Your Skin

To look your very best at any event we encourage our patients to have a **Comprehensive Skin Evaluation** with one of our highly skilled skincare consultants. They will guide you in finding a skincare regimen that fits the physiology of your skin and your lifestyle. Your skincare consultant will determine the proper skincare treatments (or a combination of treatments) that you will need to achieve healthier, younger looking skin. Our consultants will also recommend products to help maintain your results and promote over all healthier skin.

## 2. Add Some Window Dressing

We have all heard the phrase "Your eyes are the windows to your soul" and when your lashes are brittle, broken and thin they do little in leaving a lasting impression. Thank goodness there is a solution – **Latisse**. In as little as 4 weeks, Latisse can make your lashes grow thicker, fuller and longer, beautifully framing your eyes adding an elegant border instantly making your eyes pop.

**Top:** One of our patients before Latisse®.  
**Bottom:** The same patient after Latisse®.

## 3. Perfect Your Pout

Nothing is more inviting than a warm smile but as we age our mouths show signs of fatigue. Loosing fullness and elasticity, fine lines and wrinkles begin to develop near the corners of our mouth. Our nasolabial folds and marionette lines become more pronounced. Fillers like **Juvederm**, **Restylane**, **Prevelle**, and **Belotero** can restore lost volume and improve the overall quality of your skin. Our certified nurse injectors will recommend the appropriate dermal filler to achieve your desired look with little to no "down time".

**Left:** One of our patients before Dermal Filler in the lips and marionette lines.  
**Right:** The same patient after Dermal Filler in the lips and marionette lines.

## 4. Paint Your New Canvas

You don't want to bury your face in heavy, oily, additive loaded makeup products. You will want to come and see **CaloSpa Makeup Artist, Shane Denny**. Shane is a certified Jane Iredale makeup consultant and artist. Learn the skills of flawless makeup application. Find your perfect color match and have fun dolling-up.

**Left:** One of our patients before permanent eyeliner  
**Right:** The same patient after permanent eyeliner.

Our patients can also create a beautiful natural look with permanent makeup by adding color and shape to their eyebrows, lips and eyes. I am here to assist you in choosing the perfect color for your

application needs. With an expertise in brow shaping and lip contouring, I can create a beautifully natural look. Putting on makeup never became so easy.

These 4 easy steps will help create holiday ready skin. Appointments can be scheduled over a lunch hour. There is little to no down time, leaving you feeling ready and beautiful for the holidays. To set up an appointment or for more information Call **CaloSpa** at **502.814.3000** or visit our website at **www.calospa.com**.
